Cloud Practitioner FOUNDATIONAL

AWS Certified **Cloud Practitioner** (CLF-C02)

	Analytics:							
	Amazon Athena	Serverless, Interactive query service						
	AWS Data Exchange	Find and subscribe to third-party data in the cloud						
	Amazon EMR	Managed Hadoop framework						
	AWS Glue	Fully managed ETL (extract, transform, and load) service						
	Amazon Kinesis	Work with real time streaming data						
	Amazon MSK	Fully managed service for Apache Kafka						
	Amazon OpenSearch Service	Run and Scale OpenSearch and Elasticsearch Clusters						
	Amazon QuickSight	Fast, easy to use business analytics						
	Amazon Redshift	Fully managed, petabyte-scale data warehouse service						
1	Application Integration							
-	Amazon EventBridge	Serverless event bus to decouple event						
	Amazon SNS	producers and consumers						
		Managed message topics for Pub/Sub						
	Amazon SQS	Managed message queues Serverless function orchestrator						
	AWS Step Functions	Serveness function of chestrator						
h								
	Business Productivity:	A contact center that enables engagement at						
	Amazon Connect	any scale						
	Amazon SES	Email sending and receiving service						
and an enveroper second se								
1	Compute:							
	Compute: AWS Batch	Fully managed batch processing at any scale						
		Fully managed batch processing at any scale Virtual servers in the cloud						
	AWS Batch							
	AWS Batch Amazon EC2 Amazon Elastic	Virtual servers in the cloud						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk	Virtual servers in the cloud Run and manage web apps						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength Containers:	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength Containers: Amazon ECR	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength Containers: Amazon ECR Amazon ECS	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength Containers: Amazon ECR Amazon ECS Amazon EKS	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength Containers: Amazon ECR Amazon ECS Amazon EKS	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS Simplifying your billing practice						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength AWS Wavelength Containers: Amazon ECR Amazon ECS Amazon EKS Cost Management: AWS Billing Conductor AWS Budgets	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS Simplifying your billing practice Set custom budgets and receive alerts						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength AWS Wavelength Containers: Amazon ECR Amazon ECS Amazon EKS Cost Management: AWS Billing Conductor AWS Budgets AWS Cost and Usage	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS Simplifying your billing practice Set custom budgets and receive alerts Most comprehensive set of AWS cost and usage						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength AWS Wavelength Containers: Amazon ECR Amazon ECR Amazon ECS Amazon EKS Cost Management: AWS Billing Conductor AWS Billing Conductor	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS Simplifying your billing practice Set custom budgets and receive alerts Most comprehensive set of AWS cost and usage data						
	AWS Batch Amazon EC2 Amazon Elastic Beanstalk Amazon Lightsail AWS Local Zones AWS Outposts AWS Wavelength AWS Wavelength Containers: Amazon ECR Amazon ECS Amazon EKS Cost Management: AWS Billing Conductor AWS Budgets AWS Cost and Usage	Virtual servers in the cloud Run and manage web apps Launch and manage virtual private servers Run latency sensitive applications closer to end users Run AWS Services on premises Deliver ultra-low-latency applications for 5G devices Fully-managed Docker container registry Highly secure, reliable, and scalable way to run containers Managed service to run Kubernetes on AWS Simplifying your billing practice Set custom budgets and receive alerts Most comprehensive set of AWS cost and usage						

Customer Engagement: AWS Activate for Resources to help startups build and grow on Startups AWS Complete projects faster with help from third-AWS IQ party AWS Certified experts AWS Managed Operational excellence in the cloud Services (AMS) Contact AWS for technical and account support. AWS Support Database: MySQL and PostgreSQL compatible relational Amazon Aurora database Amazon DynamoDB Managed NoSQL database Amazon MemoryDB Fully managed, Redis-compatible, in-memory for Redis database service Amazon Neptune Fast, reliable graph database built for the cloud Managed relational database service Amazon RDS **Developer Tools:** Manage Dynamic Application Configuration and AWS AppConfig Feature Flags Enables you to interact with AWS services using AWS CLI commands in your command-line shell A Cloud IDE for writing, running, and debugging AWS Cloud9 code A browser-based shell with AWS CLI access from AWS CloudShell the AWS Management Console Secure, scalable, and cost-effective artifact AWS CodeArtifact management for software development AWS CodeBuild Build and Test Code AWS CodeCommit Store Code in Private Git Repositories AWS CodeDeploy Automate Code Deployments AWS CodePipeline Release Software using Continuous Delivery AWS CodeStar Quickly develop, build, and deploy applications Request tracing, exception collection, and AWS X-Ray profiling capabilities End user computing: Amazon AppStream Stream desktop applications securely to any 2.0 web browser Amazon WorkSpaces Desktops in the Cloud Amazon WorkSpaces Browser based access to internal sites and SaaS web applications with enterprise controls Web Front-end web and mobile AWS Amplify Build extensible, full-stack web and mobile apps Real-Time Data Sync Using GraphQL for Mobile & AWS AppSync Web Apps, Online or Offline Test Android, iOS, and Web Apps on Real Devices **AWS Device Farm** in the Cloud **Internet of Things:** AWS IoT Core Connect Devices to the Cloud AWS IoT Greengrass Deploy and run code on your devices Machine learning: Amazon Comprehend Analyze unstructured text Highly accurate enterprise search service Amazon Kendra powered by ML
